

NAMI SHAH

DEVELOPER • CONSULTANT

ABOUT ME

Self-taught developer with a solid professional and academic background in Cyber Security. With an in-depth knowledge on both programming and security principles I have developed a comprehensive skill set. Hands-on experience in leading and conducting security assessments. Proficient in front and back-end coding languages, such as Python, React.JS, TypeScript, Swift, Java, Django, and more. Newfound passion for blockchain technology, currently learning with a desire to grow in this rapidly evolving space.

EDUCATION

University of Warwick

2017 - 2018

MSc. Cybersecurity and Management

Distinction

Dissertation on "Applying Machine Learning to Automate Detection and Mitigation Processes for On-Going Ransomware Attacks on Windows Environments."

<https://github.com/ShahNami/Dissertation>

University College Howest

2013 - 2016

BSc. Applied Computer Science and Cybercrime

First-Class

EXPERIENCE

F-Secure Consulting (previously MWR InfoSecurity)

2019 - present

- Open-Source intelligence service development.
 - Internal tool development.
 - Bucket – Modular Python web scraper for bulk domain parsing and categorising into collections.
 - Impulse – Dockerised and secured calendar manager used to automate the import of events into MacOS.
 - Sn0int (module) – Rust and Python script to bridge commands from the Rust sandbox to the host system.
- Cybersecurity Consultant**

- Researched the Handshake (HNS) blockchain protocol.
- Infrastructure, mobile and web application testing.
- Led and trained associate consultants to deliver external asset mapping assessments.

App Maven Limited

2019 - present
Managing Director

- Web and Mobile application development (React, TypeScript, Django, React-Native, Swift, Java / Kotlin).
- Setup and deployed a validator node for the Monet blockchain network.
- Participant in the Mosaic Networks Hackathon
